Education

Vellore Institute of Technology, Chennai 2021 – 2025
B.Tech, Electronics and Computer Engineering · CGPA: 8.53/10 *Chennai, India*

Experience

Advanced Application Engineering Analyst Oct 2025 – Present
Accenture *Chennai, India*

- Built a dependency-tracking service in **Python/FastAPI** that queries Azure DevOps REST APIs (WIQL, link-relation traversal) to build a **cross-team dependency graph** over 100+ concurrent work items, score at-risk deliverables, and route escalations to the right forum (team standup, ART sync, FED).
- Implemented **incremental sync** using content hashing and timestamps so each run reprocesses only changed work items.
- Automated a multi-stage cloud-migration workflow: a static scanner maps 100+ AWS/GCP SDK dependencies to Azure equivalents, backed by retrieval (RAG) over 1,000+ documentation pages; reduced manual migration effort by ~80%.
- Added unit and integration tests, **CI/CD pipelines in Azure DevOps**, structured logging, telemetry, and alerting; the services are used across multiple delivery teams.

AI Code Reviewer (Contract) Dec 2024 – Jun 2025
Outlier (Scale AI) *Remote*

- Reviewed LLM-generated solutions to algorithmic and software-engineering problems for correctness, time/space complexity, and edge cases; wrote reference solutions and grading feedback used in SFT and RLHF training.

Projects

Real-Time Sign Language Translator | *Python, TensorFlow, OpenCV, MediaPipe*

- Built a real-time ASL/ISL recognizer: MediaPipe hand landmarks feed a BiLSTM classifier trained on 5,000+ samples; 92% test accuracy at under 200 ms per prediction, with translation of the recognized text into other languages.

CodeXchange, LLM Code Translator | *Python, Vertex AI, Streamlit* github.com/eswar-varun/CodeXchange

- Translates code between 10+ programming languages using an LLM on Vertex AI; prompt engineering cut translation errors by ~30%. Shipped as a Streamlit web app.

Technical Skills

Languages: Java, Python, C, C#, SQL, JavaScript
Backend & Cloud: FastAPI, Flask, REST APIs, Docker, Azure, AWS, GCP, Azure DevOps CI/CD
Databases: MySQL, MongoDB
Tools & ML: Git, PyTorch, TensorFlow, LangChain, RAG
Certifications: AWS Certified Cloud Practitioner (2024)
